英米学科

Communicative English I (3) (D)

ドリュー ジェームズ先生

Communicative English 1 is a year-long course for first-year students. Its goals include helping students improve skills related to real-world communication. In the full course, various tasks - including plenty of speaking & communication activities - aid students in developing English fluency and understanding pragmatic language use. Course topics range from daily conversational themes to matters of global importance. The course is conducted entirely in English, and is aimed at students with a proficiency level of approximately CEFR B1. If you would like to observe a class session, you would be very welcome. It would be a pleasure to have you join us.
